

Instructions for The 2018 Calendar for Mystical Alignment

To simply and effectively journey with the calendar:

Notice that each day has a number from 1-13 associated with it. These are NOT the Kin numbers. Look for the numbers to the far right that are combined with a Mayan Archetype.

These numbers notate where we are in the 13 day wave. There is a colorful symbol on each day that also reflects that number in a symbolic form. See the back of this sheet to understand and work with the corresponding directives for each number or “tone”. If you want to take this even further, another enclosed sheet gives you the meanings for each of the 20 Mayan Archetypes of Measurement. These, combined with your own understanding of each number or tone, can expand whatever you're ready to sense about each day.

Note for the 2018 Edition -

I have been weaving together two different counts (Galactic and Gaiac) in my more recent calendars. The phrases/images offered allowed us to work as shamanic dream weavers and alchemists. On this printed calendar, I am not offering any phrases as the given ones for each day, although they are still available to you (see below). The Dreamspell originally meant "any agreed upon reality". We've taken counts and interpretations and agreed upon them to some degree. Now I'm asking the question "Are we limiting our experience based upon what day we think/agree it is?" The jury is still out on that one.

This year's printed calendar has the Dreamspell/Galactic count still noted. The thing that I consider the most important and transformative when following this calendar is the simple tracking of 13-day cycles. Just doing that can have a profound effect and lift you out of the crusty trance of the Gregorian Calendar and into Galactic harmony. The 2018 printed calendar is designed to help you focus on that. A free online multifaceted calendar is currently in the works for 2019. **If you'd like to work with the Shamanic Phrases, as well as as Burners, Portals, etc. - you can still build them into your equation by utilizing the Supplemental Tables, available as a free download on the Mayan Calendar page of my website.** Those phrase pairs and notations will remain relevant and can be referenced and utilized until February 29th (Leap Day) of 2020.

The Mayan Calendar page at www.ExMarksTheSpot.com offers free supplemental audio and visual files designed to help you further understand this calendar and the cosmic nature of time and timing. Many Blessings as you spiral with Cosmic Time!
